SETC expands its footprint to Italy and Europe through a strategic partnership with The Energy Future Group (TEFG) and newest advisory member, CEO of TEF, Calogero Lumia

For Immediate Release

Miami, FL - August 2022 - SETC plans to expand its footprint globally. Gruppo EF Technologie and Calogero Lumia have been developing a new way to create renewable energy from livestock and waste. As this new market emerges, we see a great need to partner with forward thinking individuals who are pioneers in the ESG arena. Lumia struggled to find funding for his ESG dream when no one believed in his vision. Lumia has been awarded contracts with Chevron and other sustainable leaders, as well as the funding he needs to pursue his ESG initiative that will change the way waste is viewed, after relentless and non-stop persistence.

Lumia brings over 40 years of experience in the areas of environmental, social, and governance to SETC. In addition to being a member of the NC Decentralized Presidential Advisory Council and the New York World Energy Forum, Lumia is an alumni of both Duke University and The Fuqua School of Business.

SETC was founded by BWG Strategy and WWT as a sustainable initiative. Every month, SETC hosts webinars on hot ESG topics. The event is open to people involved in local, regional, national, and global initiatives related to ESG and individuals interested in learning more.

"I am looking forward to this global opportunity to take SETC to the next level. This new partnership will definitely catapult us to where we need to be to spread the word and mission to professionals everywhere that can affect global change. - John Czelusniak, SETC, Senior Executive Advisory Board Member"

About WWT

World Wide Technology (WWT), a global technology solutions provider with \$14.5 billion in annual revenue, combines the power of strategy, execution and partnership to accelerate transformational outcomes for large public and private organizations around the world. Through its Advanced Technology Center, a collaborative ecosystem of the world's most advanced hardware and software solutions, WWT helps customers and partners conceptualize, test and validate innovative technology solutions for the best business outcomes and then deploys them at scale through its 4 million square feet of global warehousing, distribution and integration space. With over 8,000 employees and more than 55 locations around the world, WWT's culture, built on a set of core values and established leadership philosophies, has been recognized 11 years in a row by Fortune and Great Place to Work® for its unique blend of determination, innovation and leadership for diversity and inclusion. With this culture at its foundation, WWT bridges the gap between business and technology to make a new world happen for its customers, partners and communities.
